Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Continued Examination Under 37 CFR 1.114

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 9-21-07 has been entered.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 23, 25-31, 36-42, 47-49, 69, 70, and 71 are rejected under 35 U.S.C. 102(b) as being anticipated by Novak et al.(Chem Mater. document).

Novak et al. disclose preparations of crosslinked aerogels prepared by forming a sol-gel material as defined by applicants' claims, solvent to form a wet-gel film followed by drying through supercritical and sub-critical drying processes as defined by

applicants' claims, which read on the products and processes of applicants' claims (see the entire document).

Claims 23, 25-31, 36-42, 47-49, 69, 70, and 71 are rejected under 35 U.S.C. 102(e) as being anticipated by Yim et al. (Korean J. Chem. Eng. document).

Yim et al. disclose preparations of polyisocyanate crosslinked aerogels prepared by forming a sol-gel material as defined by applicants' claims, solvent to form a wet-gel film followed by drying through supercritical and sub-critical drying processes as defined by applicants' claims, which read on the products and processes of applicants' claims (see the entire document).

Applicants' arguments have been considered. However, rejections are maintained. Applicants have not established the differences discussed in their reply to be associated with differences in the products claimed as they currently stand claimed. Difference is not seen in the products as claimed based on the terminology used in defining the combined components and/or the order in which they are combined. The reaction effects discussed at the top of page 14 of applicants' reply are not reflected by the limitations of the claims. The prior art references disclose crosslinkage to the degree required by applicants' claims. Further, applicants' claims do not require exclusion of and/or distinguish over the isocyanate materials disclosed by Yim et al.
